PROGRAMME FOCUS OF UNICEF PAPUA

NUTRITION

Acceleration of the national stunting reduction movement to address malnutrition through lifecycle. By adopting a lifecycle approach, it integrates various sectors and strategies to tackle the underlying causes of malnutrition.

WASH

Improving access to water and safely managed sanitation through high-level advocacy and partnership with strategic institutions to eliminate open defecation at the community level.

HEALTH

Continue to provide support for overall health system strengthening especially on key areas of malaria elimination, Covid-19 vaccination & basic immunization coverage, quality newborn care, and prevention of childhood illnesses.

EDUCATION

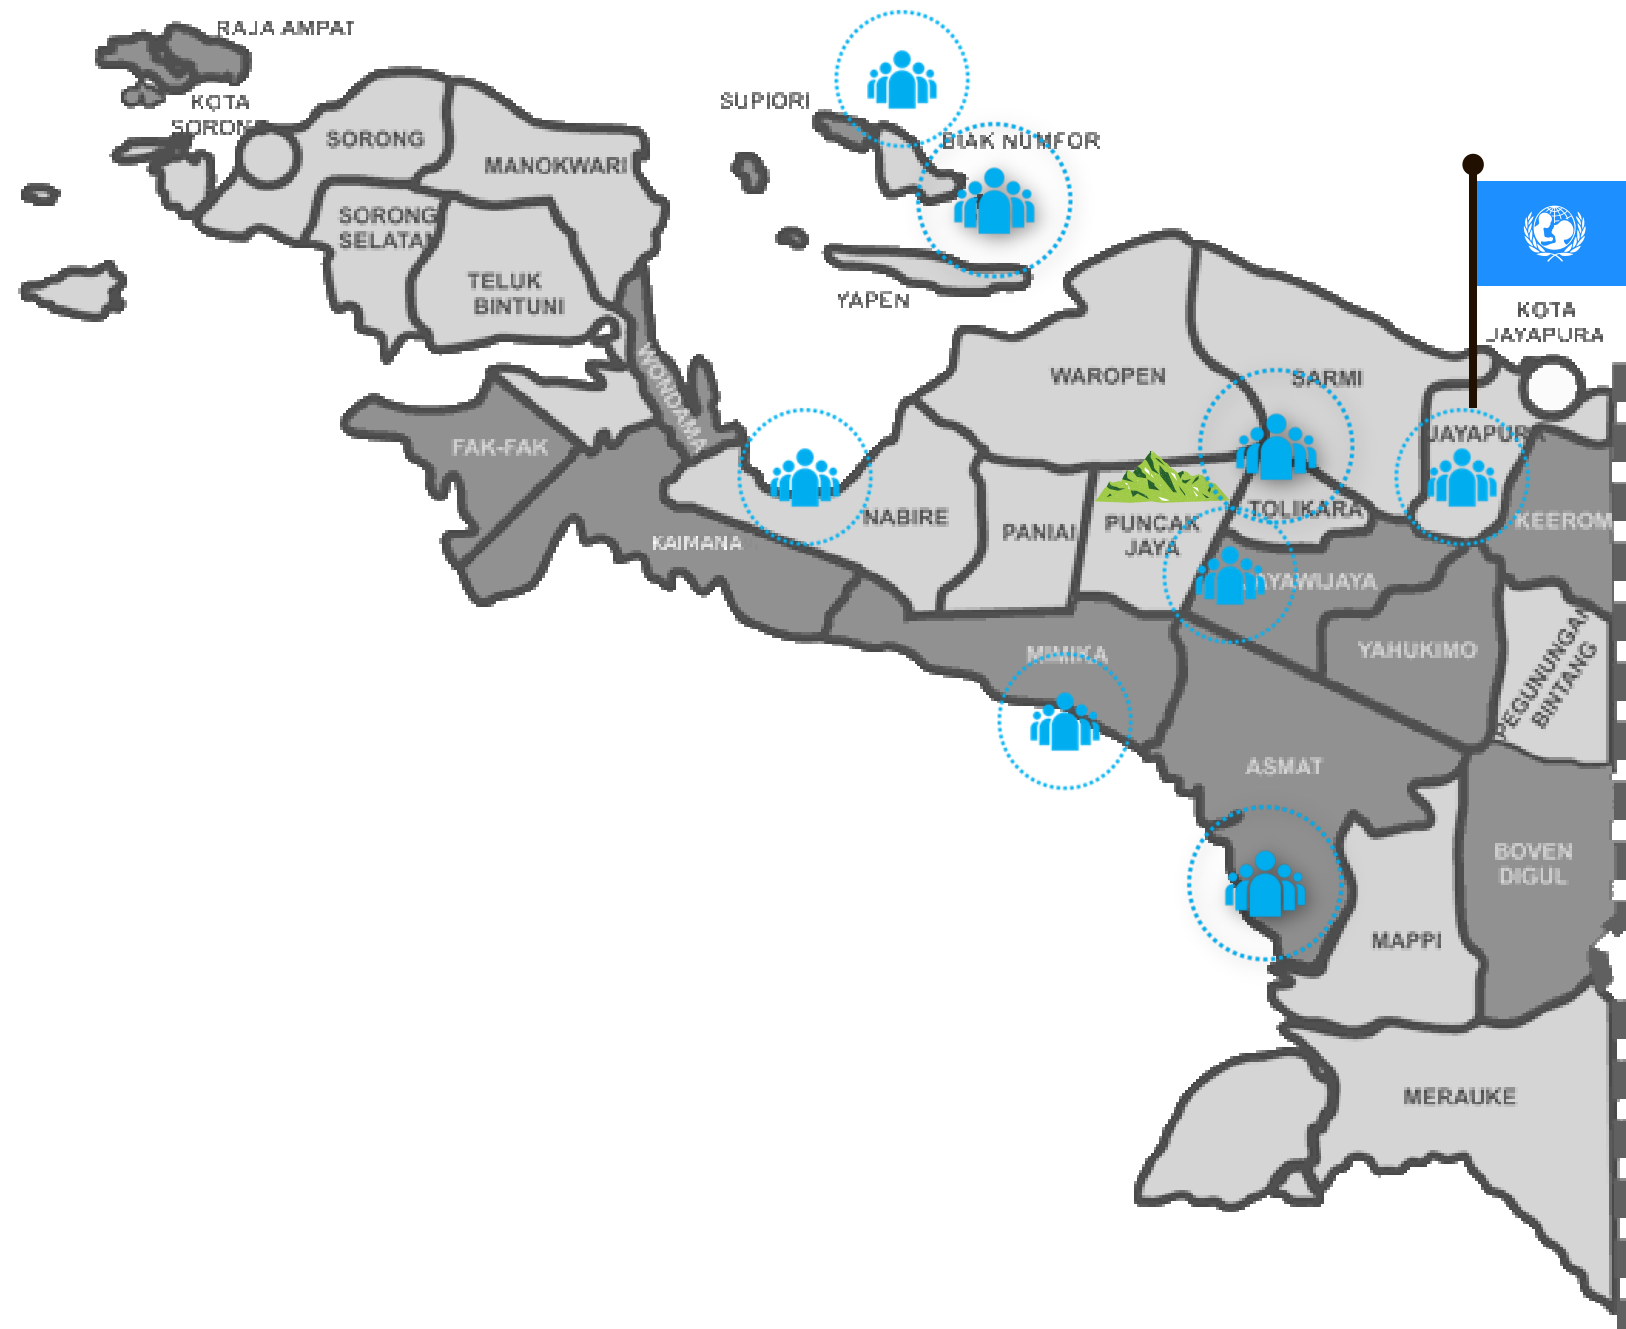

Continue providing support to education institutions to 'build back better' after the pandemic through Foundational Skill Learning programme; strengthening and replicating HI-ECD; sustaining the Life Schools Education (LSE) implementation through finalization of the Life Skill Education roadmap.

CHILD PROTECTION

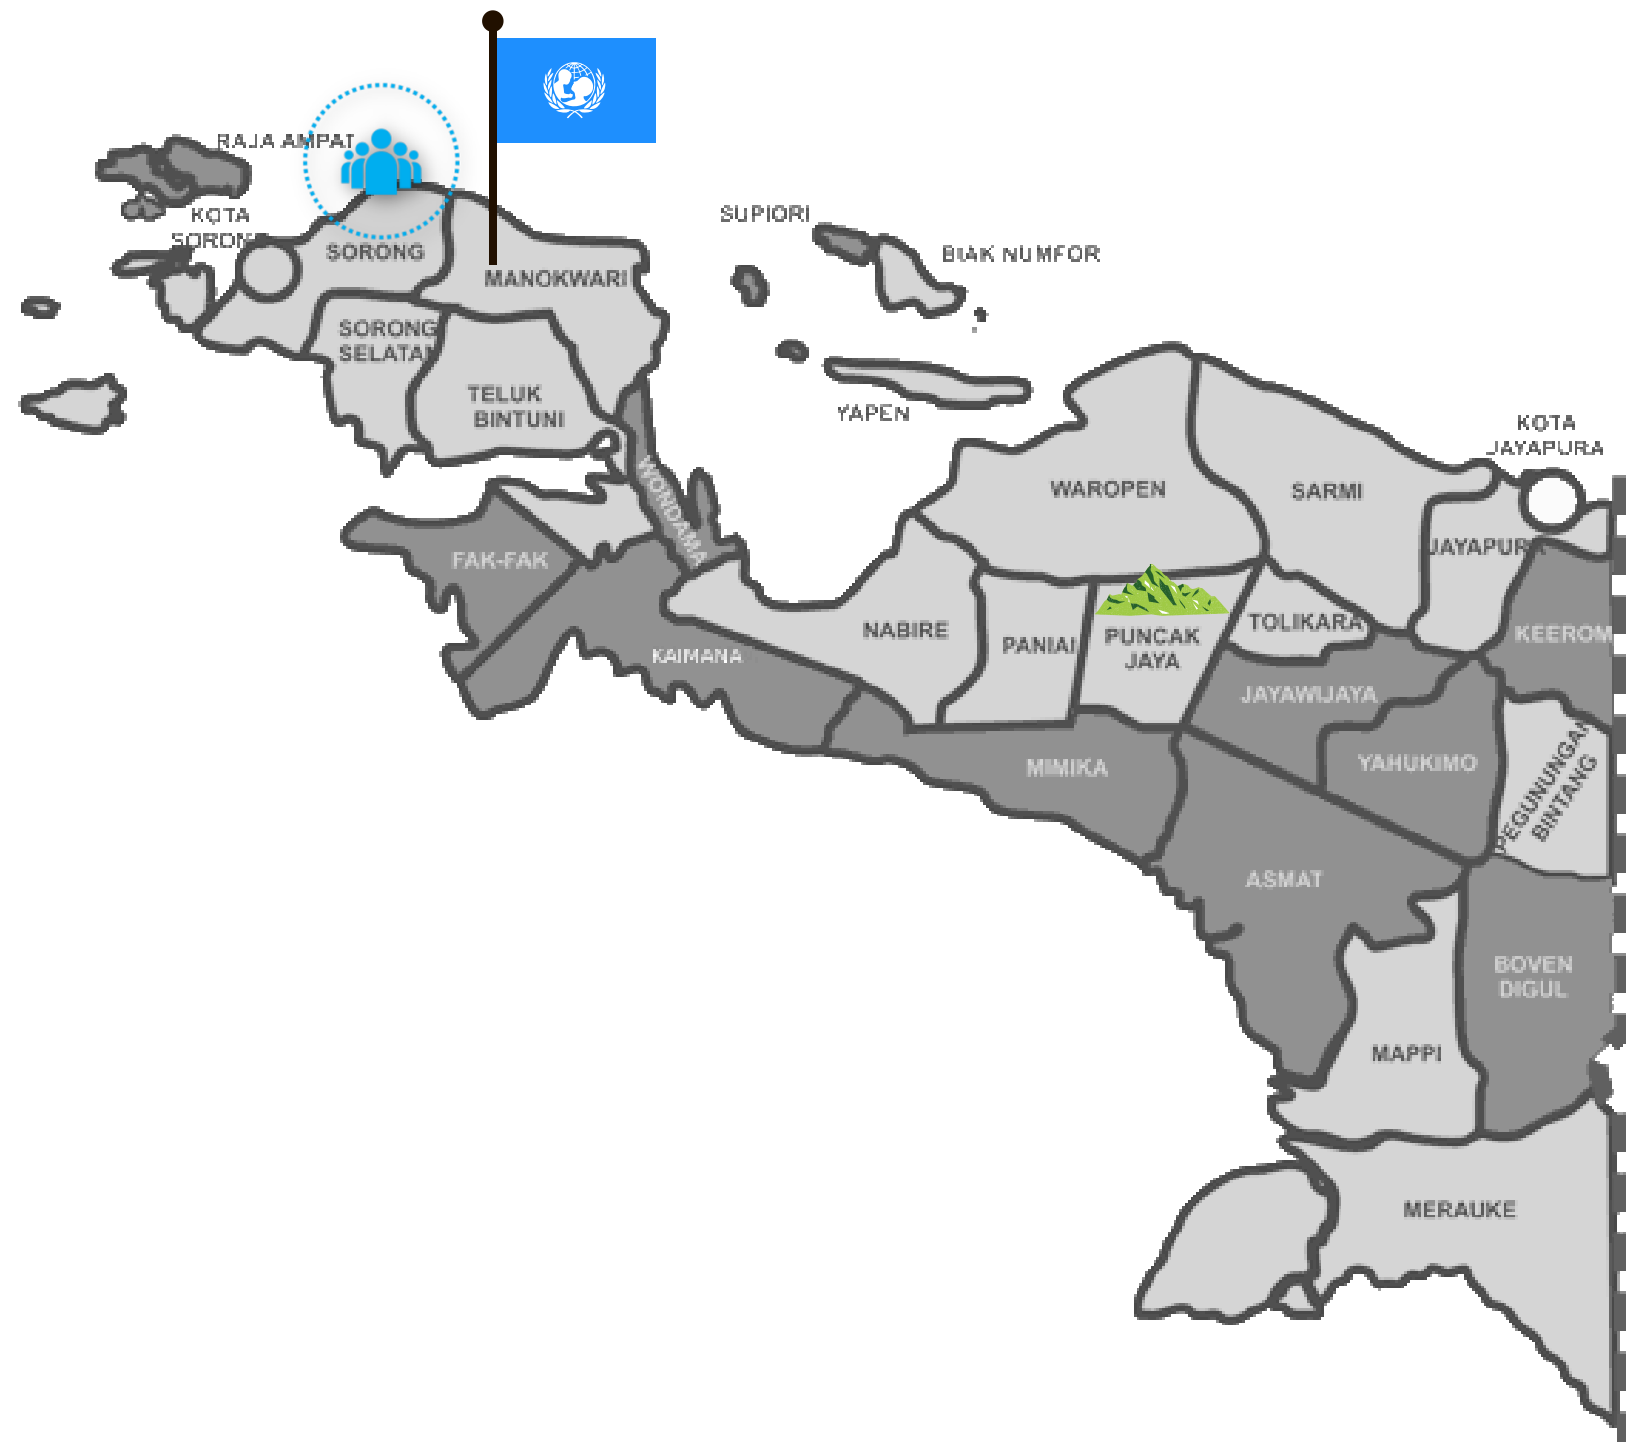

Continue to support the establishment and strengthening of the child protection/ social welfare system through the establishment/adoption of relevant policies & initiatives from the national level to province and district levels.
